Product Designer with a core background in cognitive engineering. I leverage user research and information architecture to simplify complex workflows, build scalable Design Systems, and ship intuitive digital products within cross-functional teams.

WORK EXPERIENCE

UX Designer Intern Ubisoft — Feb 2026 - Jul 2026, Paris

- Validated operational friction points by auditing 20+ channels and 60+ community reports.
- Facilitated a workshop with 6 internal leads, filtering 24 concepts to define a core initiative.
- Modeled cross-departmental RACI governance to clarify responsibilities across 2 key user journeys.
- Secured alignment across 3 departments by translating complex technical workflows into storyboards.

Lead UX Designer Stealth Startup — Apr 2025 - Jan 2026, Bordeaux

- Validated the strategic pivot by proving a 77.5% swipe rejection rate (300+ users) via quantitative data.
- Structured the core journey using PACE methodology to proactively mitigate usage friction risks.
- Framed developer handoff via a tokenized Design System (69 variables) guiding 100+ high-fidelity screens.

UX Consultant Intern Airbus & IMS Laboratory — May 2025 - Jul 2025, Bordeaux

- Diagnosed 3D simulator abandonment by triangulating 7 field interviews with 29 quantitative responses.
- Prioritized 28 usability blockers by structuring diagnostic data through a heuristic matrix.
- Specified 25 UX solutions (e.g., contextual radial menu) to recenter software usage on vocational training.
- Secured sign-off from Airbus by delivering detailed specifications and a 63-page UX analysis report.

KEY PROJECTS

EmCo, Mobile Biometric Diagnostic App UX Designer, (Academic) — Jan 2026

- Prototyped a MedTech app visually decoupling emotion and cognitive load via biometric telemetry streams.
- Simplified data analysis by replacing a dense heatmap with a 2D grid paired with a temporal slider.

Design Relay, Systems design & field testing UX Designer, (Academic) — Oct 2024 - Apr 2025

- Co-framed 11 ambiguous requirements into 4 clear functional pillars for a smart desk controller.
- Built the mobile app high-fidelity prototype from scratch leveraging Auto Layout and components.
- Proved lack of digital utility over physical habits through guerrilla usability testing with 9 shoppers.

Intranet IA Overhaul UX Researcher & Designer, (Academic) — Oct 2025 - Dec 2025

- Restructured 33 tools into 12 mental-model-aligned categories by co-facilitating an open card sort (N=9).
- Clarified global navigation by renaming 7 opaque acronyms based on synthesized user feedback.

Figma Course, Student Curriculum UX Course Author (Self-Initiated) — Nov 2025 - Jan 2026

- Designed a Figma curriculum (90+ slides) guiding beginners from UI fundamentals to developer handoff.

SKILLS

Research: User Research (Qual & Quant), Usability Testing (SUS, UMUX, AttrakDiff), Heuristic Evaluation, Information Architecture, Card Sorting, Similarity Matrix, Contextual Inquiry, A/B & Comparative Testing.

Design: Wireframing, Rapid Prototyping, Visual Storytelling, Storyboarding, Design Systems (Tokens & Variables), 3D Spatial Ergonomics, Cognitive Load Optimization, Mental Model Mapping, Accessibility (WCAG 2.1 AA).

Strategy: Co-Design Workshop Facilitation, Ideation (ASIT, Impact/Effort), RACI Framework, Design Enablement, Product Roadmap Alignment, Stakeholder Strategy.

Tools: Figma (Advanced Auto Layout, Variants, Variables, Components), FigJam, Miro, Jira, Notion, Whisper, Git.

Languages: French (Native), English (C1).

EDUCATION

Master's Degree in Cognitive Engineering (diplôme d'ingénieur) ENSC — 2023 - 2026, Bordeaux

Specialization: UX Design, Human-Computer Interaction, Data Analysis
